PROFESSIONAL SUMMARY

Android Developer skilled in Kotlin and Java with extensive expertise in MVVM, Clean Architecture, Coroutines, and Dependency Injection (Hilt/Dagger), with experience in building scalable financial apps focused on performance and user experience

EDUCATION

B-Tech Computer Science and Engineering, GEC Wayanad, APJ Abdul Kalam Technological University 2019-2023
CGPA: 7.1

SKILLS

Technical Skills	Kotlin, Java, Android SDK, Android Studio, MVVM, Coroutines, Flow, LiveData, Hilt, Dagger, Firebase (Firestore, Analytics, FCM), RESTful APIs, Google Maps SDK, Room,Dependency Injection,Local storage (Room, SQLite, Realm, SharedPreferences),Payments and SDKs,Performance and observability,Security and auth
Soft Skills	Communication and Presentation, Cross-functional collaboration (product, design, QA, backend), Problem solving , debugging, Time management and prioritization, Stakeholder management, Continuous learning, Attention to detail (testing, accessibility, localization)

PROFESSIONAL EXPERIENCE

Android Developer — Oct 2024 – Present
MAFIL — *Kerala, India*

- Architected and developed scalable Android applications using MVVM and Clean Architecture patterns with Kotlin and Java.
- Developed modern, responsive user interfaces with XML-based Android layouts and Material Components, improving UI performance and development speed.
- Implemented asynchronous programming models using Kotlin Coroutines and Flow to enhance app responsiveness.
- Integrated Firebase services including Firestore, Cloud Messaging, Analytics, Remote Config, and Crashlytics to improve app stability and user engagement.
- Enabled continuous integration and deployment pipelines using GitHub Actions for faster and safer app releases on the Play Store.
- Collaborated with product owners and UI/UX designers to implement Google Material Design standards ensuring consistent modern app experience.
