A passionate and dedicated Electronics and Communication Engineering student specializing in Java Full Stack Development, with a strong interest in building efficient, reliable, and user-friendly web applications. Possessing solid knowledge of Java, SQL, HTML, and CSS, I am eager to contribute to dynamic development teams, enhance technical expertise, and continuously learn emerging technologies that drive innovative and impactful software solutions.

EDUCATION

B.E. Electronics and Communication Engineering

Anna University – Regional Campus, Madurai | CGPA 8.00

Oct 2021 – May 2025

SKILLS

Frontend Development – HTML, CSS, Bootstrap, JavaScript, React

Backend Development – Java

Database Management – MySQL, SQL, CRUD Operations

Tools & Platforms – VS Code, Eclipse

Soft Skills – Problem Solving, Analytical Thinking, Team Collaboration

EXPERIENCE

Java Full Stack Development– School of Coding (Edubridge)

(June 2025 – September 2025)

- Trained in **frontend + backend development** using Java and SQL.
- Gained hands-on experience in **developing, testing, and debugging** full-stack web applications.

PROJECTS

Disease Classification using Deep Learning – Python | CNN

- Built a deep-learning model for automatic classification of medical images (brain, chest, and skin).
- Achieved accurate detection through data preprocessing, CNN architecture, and evaluation metrics.
- Focused on improving medical diagnosis through AI-based image recognition.

Online Bookstore Application – Java | MySQL

- Developed a dynamic online bookstore enabling users to browse, search, and purchase books.
- Designed and integrated **SQL database** to manage books, stock, and orders efficiently.

CERTIFICATIONS

- **Mastering MySQL: From Beginner to Advanced** – Udemy
- **Learn SQL with 100 Coding Exercises** – Udemy
- **Mastering HTML5 and CSS3 (Part 3 - Advance Level)** - Udemy
