## WORK EXPERIENCE

### Software Engineer

#### HORIZONCLOUDSOFT SERVICES PRIVATE LIMITED

07/2023 - Present

Pune

##### Achievements/Tasks

- Developed and deployed modern SharePoint solutions using custom lists, libraries, workflows, forms, and SPFx web parts and extensions to enhance collaboration and usability.
- Designed and developed Power Apps (Canvas apps) integrated with SharePoint and automated workflows via Power Automate, enabling streamlined data management and improved user productivity.
- Configured site structures, navigation, branding, and permissions, incorporating automation via Power Automate for streamlined user experiences.
- Automated business processes and data integrations using Power Automate and PnP PowerShell, improving operational efficiency and reducing manual efforts.
- Migrated SharePoint sites, lists, libraries, and user permissions using ShareGate and PnP PowerShell ensuring smooth transitions with minimal business disruption.
- Delivered tailored SharePoint solutions by closely collaborating with business stakeholders to gather requirements and provide customized implementations.
- Provided SharePoint administration support including site collection management, permission handling, issue resolution, and environment optimization.
- Implemented responsive and user-friendly SharePoint pages and dashboards using SPFx, modern UI components
- Optimized document structure and metadata taxonomy for hierarchical libraries, improving document discoverability and enabling advanced search capabilities in SharePoint.

Office 365

PowerApps

Power Automate

PnP PowerShell

SharePoint Administration

Time Management

Workflows

Customization

Developer Approach

HTML

CSS

React

Problem Solving

Communication

Adaptability

SharePoint Designer

## PROJECTS

### SimplePay

SimplePay is related to the financial and administrative stream, specifically focusing on payment processing and delegation of authority within various regions (AZ US, AZ Canada, Medi US, UK, and Europe). This involves managing non-invoice payments through a web-based system, which is typically handled by financial management, accounting, and administrative departments in organizations.

### -GSR

Developed a application integrated with SharePoint document libraries that contained multiple nested sub-libraries. Implemented dynamic navigation to browse documents across hierarchical folders, enabled upload, view, and metadata update features, and connected Power Automate flows for automated notifications and version control. Improved document accessibility, reduced manual search time, and streamlined team collaboration across departments.
