LinkedIn

Full Stack Developer with **2+ years of experience** in **ASP.NET, C#, SQL, and modern front-end frameworks**. Skilled in building secure, scalable, and high-performance web applications with strong expertise in problem-solving, debugging, and optimization.

Skills

Programming Languages :: C#, JavaScript, HTML, CSS, LINQ

Web Development Frameworks :: ASP.NET Core, ASP.NET MVC, ASP.NET Web API, ASP.NET Web Forms, Bootstrap, Ajax, JQuery, REST API, Web Services, AngularJS

Database Management :: SQL, ADO.NET

Tools & Platforms :: Visual Studio, Visual Studio Code, Postman, Microsoft O365, Azure DevOps(TFS), Git, GitLab, Task Scheduler, Swagger

Additional Skills :: Unit Testing, Manual Testing, Performance Tuning, Integration Testing, Secure Coding

Experience

Software Developer • Dharani Info Technologies • Guntur, India   Nov '23 – Nov '25

Responsible for developing scalable and secure web applications using **ASP.NET,SQL, AngularJS, and other frontend frameworks**, with a strong focus on performance, usability, and client satisfaction.

- Built responsive UI components and optimized backend modules to improve system efficiency.
- Collaborated with clients to gather requirements, implement updates, and deliver milestones on schedule.
- Debugged and optimized codebase, adding features and resolving issues.
- Conducted unit and integration testing before production deployment.
- Created and maintained technical documentation for system architecture.
- Involved in end-to-end Agile processes such as sprint planning, analyzing requirements, breaking down tasks, and ensuring timely delivery.

Projects

Letter Hub Web Application & Admin Panel | Link

Letter Hub is a digital mailroom platform that automates the printing, mailing, and tracking of documents such as invoices, notices, and personal letters. It offers features like customizable templates, bulk invoicing, real-time delivery tracking, secure API access, and full compliance with data protection regulations.

- Developed **responsive UI interfaces** and **scalable backend features** for Admin and User panels, supporting dynamic templates, PDF generation, and automated invoice workflows
- Created **CLI bots** for automation and scheduling of recurring tasks, reducing manual efforts by **80%**.
- Optimized **stored procedures (SPs)with index-based enhancements,** boosting query performance by **40%** and improving large-scale data processing and deletion operations.
- Integrated **third-party APIs** (Zoho, Gmail, QuickBooks Online, FreshBooks, Xero) to automate contact management and invoice processing
- Developed a **multithreaded PDF processing system** using C# and Aspose.PDF with a producer-consumer pattern, improving processing speed and automating address extraction by **40%**.

- Implemented **secure payment workflows**, enabling **credit card transactions** and automatic credit adjustments to user accounts based on job activity.
- Developed **RESTful APIs with Swagger**, ensuring secure, high-performance integrations and workflow automation
- Established **structured logging** (C# text logs & SQL JSON logs) to enhance debugging, error tracking, and system reliability.
- Implemented **JWT-based authentication** for ASP.NET Core Web APIs, enforced secure payment workflows, and applied secure coding standards across the application lifecycle.

Legalplex LLC | Link

LegalPlex LLC is a legal marketing platform that provides attorneys with real-time client leads, direct-mail lists, and practice management tools. It delivers same-day data on violations, lawsuits, and foreclosures from government systems, helping lawyers reach potential clients quickly. Attorneys can customize the exact types of leads they want by selecting specific case types and municipalities.

- Designed and developed **REST APIs** and **Web Services** for managing user data and system operations
- Participated actively in **production support**, resolving **real-time issues** and improving application stability
- Debugged multi-module issues, performed unit testing, and built SQL Server database objects (tables, procedures, views, functions) to ensure high code quality and reliable application performance.
- Utilized **Postman** extensively for API testing and validation during development.
- Deployed and managed application **releases using IIS Manager**, ensuring smooth hosting and configuration
- Conducted R&Dfor new features, implemented optimized business logic, and created efficient database functionalities.
- Followed **Agile methodology** for sprint planning, task breakdown, development, and delivery.
- Applied **SOLID principles** to build maintainable, scalable, and loosely coupled application components

Certifications

C# (Basic) | HackerRank

Angular (Basic & Intermediate) | HackerRank

Mastering AWS Serverless: Hands-On with Core AWS Services | Udemy

Education

Tirumala Engineering College, Narasaraopet, India | Bachelor of Technology   Aug '19 – Apr '23
Computer Science
