P R O F I L E S U M M A R Y

- Experienced Power Apps, Power Automate, SharePoint and Dataverse as a Datasource Developer with 3.2 Years of hands on experience in developing, and deploying innovative solutions that streamline business processes. Adept at leveraging the full capabilities of the Power Platform to create efficient workflows, automated processes, and robust applications that drive productivity and improve user experience. Proven track record in managing projects using Agile methodologies, ensuring successful delivery within deadlines. Strong problem-solving abilities, effective collaboration with cross-functional teams, and a keen focus on meeting both technical and business requirements.

W O R K E X P E R I E N C E

➢ **WEB CRYPT Technology | Pune - July 2024 To Present**

Project 1: Appraisal Compensation Application

Description: Designed and developed an application to streamline the employee appraisal and compensation review process, enabling managers to efficiently manage and evaluate employee performance.

Project 2: Expense Management System

Description: Designed and developed an expense management application that enables employees to submit claims and allows supervisor and finance managers to review, approve, or reject expenses.

➢ **SwiftWIN Technologies LLP | Pune – June 2022 To March 2024**

Project 1: Visitor Request Application

Description: Developed a visitor request application that allows users to create requests for multiple visitors in a single submission, supports manager approval, and enables individual check-in and check-out tracking for each visitor.

Project 2: Coffee Connect Application

Description: The coffee connect application is designed for the communication and team collaboration across the global companies. So it will create the pair of two employees based on the preferences for the virtual coffee connect.
