SUMMARY

As an Android Developer with 11 months of experience, I specialize in designing and implementing user interfaces using XML, Kotlin, and Jetpack Compose. My passion for technology drives me to contribute creatively to innovative projects while enhancing my expertise and building strong professional relationships

EXPERIENCE

Android Developer
CodeAegis Pvt. Ltd

📅 01/2025 📍 Noida, Uttar Pradesh

A tech company engaged in app development and IT services

- Designing and implementing android user interfaces (UI) using XML, Kotlin & Jetpack Compose in Android Studio
- Developed Android user interfaces from Figma design specifications while maintaining pixel-perfect alignment, visual consistency, and smooth functionality.
- Implementing RESTful API integration to fetch real-time data
- Collaborating with design and development teams

Android Development Intern
Whisk Software, GSPANN Technologies, Inc

📅 09/2022 - 11/2022 📍 Hyderabad, Telangana

A software company focused on developing innovative mobile applications

- Developed a fully functional Android weather application using XML, Java and Kotlin
- Implemented RESTful API integration to fetch real-time weather data
- Designed and implemented user-friendly interface components within Android Studio

EDUCATION

Bachelor of Technology
A. P.J. Abdul Kalam Technical University

📅 08/2019 - 08/2023 📍 Muzaffarnagar, Uttar Pradesh

Intermediate
Central Board of Secondary Education

📅 04/2018 - 04/2019 📍 Muzaffarnagar, Uttar Pradesh

STRENGTHS

🪄 **Technical and Communication Skills**
Proficient in Kotlin, Android development tools, and effective communication within teams

KEY ACHIEVEMENTS

🚩 **Mobile Weather Application**
Successfully developed and launched a mobile weather application, integrating real-time data and user-friendly interfaces

SKILLS

XML	Kotlin	Jetpack
Android Studio	Coroutines
RESTful API	SQL	Figma
Navigation	ViewModel

INTERESTS

🚩 **Hobbies and Interests**
Enjoys playing various sports, traveling to new places, and constantly learning new things

PROJECTS

LBW11
📅 06/2025

LBW11 is a project focusing on developing responsive and modern Android user experiences

- Designed and implemented responsive UI components with Jetpack Compose for modern Android development
- Built screen-to-screen navigation using Jetpack Navigation Component with clean and maintainable architecture.
- Integrated RESTful APIs to fetch and display dynamic data in the app
