OBJECTIVE

To secure a position with a stable and profitable organization, where I can be a member of a team and utilize my technical experience to the fullest.

SKILLS

- Microsoft Power Apps ,Canvas Apps ,Model-Driven Apps Development, Power Apps Integration with Dataverse & Custom Connectors
- Modifies the given tool to a new format and successfully runs the new tool without error .
- Cross checks the diagram of the tool, if needed corrections will be done in the CAD Tool.
- Manages the team members shift schedule , assigns role to be done and had a friendly move with them.
- Adjusts to the environment and balances the work schedule within the given time.
- Checking the clearance, rigidity and working of machined parts.
- Analysing the machining change and if needed, rework will be done according to the working space.
- Maintaining critical spares and consumables.

WORKSHOP

✓ Lathe Work,
Grinding,
Welding.

INTERESTS

- Photography
- Adventure Traveling

LANGUAGE

- ✓ Tamil
- ✓ English
- ✓ Hindi (Basics)

CERTIFICATION COURSE

📌 POWER APPS DEVELOPER

Developed and maintained PowerApps (Canvas Apps, Model-Driven Apps) and automated workflows using Power Automate.

Administered and maintained Microsoft Power Platform environments to ensure optimal performance.

Applied UX and UI principles to create modern, user-friendly PowerApps Canvas applications.

Tested and optimized implemented applications to meet high standards of quality.

Worked with SharePoint, SQL, and Dataverse to integrate and manage data effectively.

Operated within Agile methodologies to ensure efficient and iterative development processes.

📌 Nicolas Education Ltd

Had a training about Two wheeler and Four Wheeler engine dismantling and assembly.

EXPERIENCE

📌 L.G. Balakrishnan & Bros Ltd

2018 - 2022

Technical Assistant

Tool Assembly : Analysing the tool parallelism, settings check, travel and alignment .

Shift control : Assigns the tool to members and incase of error occurs, troubleshooting will be done.

Drawing Analyst : Checking the drawing of a tool as it fits perfect to run.

Tool Development : A new tool has been developed with the existing materials and runned successfully.

Quality Checking : Checks the accuracy, thickness, inner and outer dia and flatness. Provided technical assistance with tools to Juniors, Assess incoming material specifications, documented all test result for materials.

📌 Carboloy Precision Stamping

2022 - 2023

Tool Room Engineer

Team Leader : Monitoring the important work which needs immediate attention.

Shift control : Fulfills the given target with the available members in a given period of time.

Easily communicable : Coordinate communications, track and follow up of orders to be dispatched. Developed new communication protocol that improved connectivity between the company and the clients

EDUCATION

📌 SBM Polytechnic College

2018

Diploma in Automobile Engineering
78%

📌 SBM college of Engineering and Technology

2022-2025

BE - Mech
pursuing

TOOLS WORKED

- ✓ Stamping Tool, Bending Tool, Fine blanking tool, Gang Tool, Progressive Tool
