BACKEND DEVELOPER

SUMMARY

Experienced PHP Developer with over 2 years 2 months of expertise in building dynamic, high-performance web applications and robust backend solutions. Known for strong debugging and troubleshooting skills, with a track record of delivering efficient, maintainable code. Passionate about keeping up with the latest technologies and best practices to enhance application performance and user experience

SKILLS

Frontend: HTML, jQuery, Ajax

Backend: PHP, CodeIgniter, Laravel

Database: MySQL

EDUCATION

University College of Engineering- Dindigul

BE in Computer Science and Engineering		2022
Final Grade 76.6%		

Government higher secondary school, kalingapatti

HSC		2018
Final Grade 70.2%		

Government higher secondary school, kalingapatti

SSLC		2016
Final Grade 81.8%		

WORK EXPERIENCE

Web Developer

ITFlex Solutions - Madurai.

July 2023 - August 2025

- **Developed and Maintained Web Applications:** Worked on end-to-end development of client projects, focusing on delivering high-quality, user-friendly,

and responsive web applications.

- **Backend Development with PHP & CodeIgniter:** Built and optimized server-side logic, API endpoints, and database interactions using PHP and CodeIgniter, improving performance and scalability.
- **Database Management:** Designed and managed MySQL databases, optimizing queries and ensuring data integrity and security across all web applications.
- **Front-end Integration:** Used Javascript, jQuery and AJAX to integrate server side logic and collaborated with front-end developers to integrate user-facing elements using HTML, CSS to enhance user interactivity.
- **API Integrations:** Integrated third-party APIs (e.g., Google) to enhance application functionality and provide users with seamless experiences.
- **Version Control and Collaboration:** Used Git for version control, enabling seamless collaboration with team members and maintaining an organized codebase.
- **Continuous Improvement:** Regularly updated and optimized code following best practices, participated in code reviews, and contributed ideas for system improvements and new features.

PROJECT EXPERIENCE

Timesheet - Codeigniter

- Developed and maintained a **daily timesheet module** where employees are required to log their working hours at a specific time each day.
- Implemented a **missed-entry request feature**, allowing employees to request access from the admin in case of a missed submission.
- Defined clear **user roles (Employee, Admin)** for access control and task segregation.
- Admin dashboard supports:
 - **Daily attendance and scrum updates** from all employees.
 - **Real-time monitoring** of employee submissions.
 - **Comprehensive reports** displaying total working hours, project-wise and product-wise breakdowns.
- Admins can **view and analyze overall employee performance**, ensuring transparency and accountability.

EZstall - Codeigniter

[Visit site](#)

Developed a horse stall booking platform with route grouping based on user roles for better access control and permissions.

Implemented two types of events:

- **Facility Events:** Created by facilities with annual payment; supports adding multiple sub-events.
- **Normal Events:** Independent or nested under facility events with defined start and end dates.

Integrated a coupon system supporting both percentage-based and fixed-amount discounts.

Developed a dynamic booking system based on stall check-in and check-out dates.

Integrated Stripe Payment Gateway for secure online payments.

Auscanexperts - Codeigniter

[Visit site](#)

- Designed and developed the **Mentor Booking System** with full backend API integration.
- Enabled agents to **create client profiles** and manage **mentor bookings**.
- Implemented client-side functionality to **select mentors based on preferred date and time slots**.
- Integrated modules for **Job Assistance**, **Relocation Services**, and **Mentorship Programs**.
- Integrated **Stripe Payment Gateway** for secure and seamless online transactions.
- Ensured smooth scheduling, booking management, and role-based access throughout the system.
