Gayatri Bhosale

Full Stack .NET Core Developer

+91 9309116771 | gayatribhosale1199@gmail.com |

Pune, Maharashtra.

Summary:

Full Stack .NET Developer with 4+ years of experience in building scalable web applications using .NET Core, C#, Angular, SQL Server, and Web APIs. Experienced in REST API development, JWT authentication, Database operations and Agile practices.

Professional Experience:

Infosys, Pune (Technology Analyst)   **Sep 2021 – Present.**

- Worked in Agile and SDLC environments with domain expertise in the **Financial Services** sector.
- Performed full-stack development by integrating **Angular** front-end with RESTful APIs to ensure seamless data flow.
- Developed and migrated **REST APIs** from MuleSoft to .NET Core, implementing secure JWT authentication and SQL-based data access.
- Proficient in **CRUD** operations, **asynchronous** programming, **Entity Framework** (EF), and **LINQ**.
- Applied object-oriented programming (**OOP**) principles to design scalable and maintainable backend services.
- Collaborated closely with product owners and architects to understand business needs and propose optimal solutions.
- Followed **Git** workflows for version control including branching, merging, and resolving conflicts in multi-developer teams.
- I actively participated in code reviews, maintained coding standards, and contributed to designing scalable application architectures.

Skills:

Technologies

- C#
- .Net Core
- Entity framework Core
- Angular
- LINQ
- Typescript
- .Net MVC
- REST API

Database & Tools

- MS SQL
- SSMS
- Postman
- Swagger
- Git
- Jira

IDE & Platforms

- Visual Studio
- VS Code
- Windows

Major Projects:

- ➤ **Client:** LPL Financial
  Duration: Jan 2023 – Present
  Environment: C#, .NET Core, SQL Server, Angular, JIRA, Git, Kibana, Octopus Deploy, Visual Studio

  Responsibilities:

  - Migrated API from MuleSoft to .NET Core Web Api's enhancing operational efficiency for financial advisors.
  - Designed and developed backend services to expose RESTful endpoints for Create, Read, Update, Delete (CRUD) operations.
  - Implemented secure authentication using JWT (JSON Web Token), ensuring only authorized users could access application features.
  - Designed and optimized SQL Server database schemas, wrote stored procedures, and performed query optimization to improve performance.
  - Followed Agile Scrum practices, including daily stand-ups, sprint planning, code reviews, and backlog refinement.
  - Managed source control using Git, including branching, merging, and resolving conflicts in a multi developer environment.
  - Created and executed unit tests and integration tests to ensure application reliability and reduce post deployment issues.
  - Participated in deployment and monitoring using Octopus Deploy and Kibana, ensuring smooth production releases.

- ➤ **Client:** FCT Digital Gateway
  Duration: Feb 2022 – Jan 2023.

  Responsibilities:

  - Worked on Frontend using technologies like Angular, Html, CSS and Bootstrap.
  - Implemented Rest APIs using CRUD Operation.
  - Created tables in MS SQL Server and executed insert, delete, update query.
  - Co-ordinated with team on technical issues and on the proposed solution.
  - Created APIs, products and applied APIM security policies.
  - Created Azure Blob Storage for data storage and Key Vault for security.
  - Worked on Backend email template configurations and creating invoice pdf also worked on AODA Compliance.
  - Prepared Unit Test Cases and executed.
  - Performed end-to-end testing in non-production environments and Provided Client support for end-to-end testing.
  - Actively participated in bug fixing.

Education:

Savitribai Phule Pune University.
Bachelor of Engineering (IT) CGPA- 7.68

Certifications:

- Microsoft Azure Fundamentals (AZ- 900).
- Infosys Certified Global Agile Developer.
- Infosys Rise Insta Award Feb 2024.

Declaration:

I hereby declare that all the information provided above in the resume is true, complete and correct to the best of my knowledge and belief.
