No.3A, Loganathan Street, Nanmangalam, Chennai - 129

Profile

Computer Engineer with 1 year of professional experience in developing Education ERP systems. Skilled in full-stack web development, reporting automation, and database optimization. Delivered ERP solutions that improved data accuracy and reduced manual work by 40%. Seeking to contribute technical expertise and problem-solving skills to a technology-driven organization.

Education

Bachelor of Engineering (CSE)	Misrimal Navajee Munoth Jain Engineering College 2023 77%
HSC	Bharath Dass Matriculation Higher Secondary School 2019 62%
SSLC	Bharath Dass Matriculation Higher Secondary School 2017 89%

Skills

Programming & Web Development: PHP, Core Java, JavaScript, jQuery, HTML, CSS, Bootstrap, Ext JS

Database Management: MySQL (queries, stored procedures, optimization)

Reporting & Documentation: PHPExcel, TCPDF, MS Excel

Web Application Development: AJAX, REST APIs, JSON, XML

Version Control & Tools: SVN, Git, GitHub, VS Code

Soft Skills: Problem-solving, Debugging, Communication, Team Collaboration, Adaptability

Work Experience

Software Developer – Apple G Web Technology

Aug 2023 – Present

- Completed 1 year developing and maintaining Education ERP modules (attendance tracking, feedback systems, timetables, academic reporting).
- Designed dynamic user interfaces using PHP, MySQL, JavaScript, jQuery, and Ext JS.
- Implemented reporting automation using PHPExcel & TCPDF, reducing manual reporting effort by 40% and ensuring real-time accuracy.
- Implemented AJAX-based validations and real-time filters for accurate data handling.
- Optimized MySQL queries to improve ERP performance on large datasets.
- Collaborated with internal teams to resolve production issues and deploy new features.
- Guided interns on web development basics (HTML, CSS, Bootstrap, JavaScript, PHP, MySQL).

Internship

Web Development Intern – Rifuxsys Software Pvt Ltd

Jun 2024 – Jul 2024

- Learned fundamentals of HTML, CSS, Bootstrap, JavaScript, jQuery, PHP, and MySQL.
- Built responsive front-end templates and CRUD-based web modules.
- Gained exposure to web application workflow and database connectivity.

Key Achievements

- Automated ERP report generation, reducing 3+ hours of manual effort weekly.
- Improved ERP database performance by optimizing SQL queries for large datasets.
- Delivered error-free production deployments, enhancing ERP reliability.
- Mentored new interns, improving team knowledge-sharing and productivity.
