CAREER OBJECTIVE

- As a developer, I strive to grow technically, build quality software, and collaborate with teams to support organizational goals.

WORK EXPERIENCE

1) FULL STACK DEVELOPER (SENIOR PROJECT ASSOCIATE)

– June 2024 to Present

Karemind I script's Private Limited – Full-time.

Maduravoyal, Chennai, Tamil Nadu, India. On-site.

Job Description:

- Working on hospital management-related software to manage lab records, patient data, and pharmacy-related information efficiently.
- Developing APIs to display data on mobile or other platforms, testing the APIs using Postman, and implementing backend functionalities in PHP.
- Designing frontend architecture and creating backend functions using PHP for tasks such as displaying, editing, storing, and updating data. Data is securely stored and managed using PhpMyAdmin server and SQL databases.
- The Hospital Information Management System (HIMS) is a software solution that streamlines hospital operations by automating tasks, improving data management, and enhancing patient care. It integrates key departments like patient management, billing, and inventory, reducing errors and paperwork. HIMS boosts efficiency, cuts costs, and improves patient experience, making it essential for quality healthcare delivery.

- **Hospital information management system software**
