

# KEDARA SAI NAGIREDDY

sainag189@gmail.com | 7997481289 | Hyderabad 500072

## Summary

Results-driven **Mobile Application Developer** with 3.1 years of experience in designing, developing, and deploying **high-performance Android and iOS applications** for **telecom and enterprise clients**. Proficient in **Java, Kotlin** Languages. Having Expertise in **Android SDK, MVVM architecture, Room Database, and Firebase** for building scalable Android solutions. Beginner in **Swift, Xcode, and SwiftUI** for developing intuitive iOS interfaces and ensuring design consistency across platforms. Skilled in **RESTful API integration, JSON parsing, and UI/UX design** following **Material Design**. Adept at **performance optimization, Agile/Scrum development, and version control** using **Git**, with a proven track record of delivering **high-quality, maintainable, and production-ready applications** published on the **Google Play Store and App Store**.

## Skills

- Android development
- IOS Development
- Java programming
- Kotlin programming
- Swift + Swift UI
- RESTful APIs
- UI/UX design
- Agile methodologies
- XML
- Android SDK
- Android Jetpack (LiveData, ViewModel, Navigation)
- Firebase (Realtime DB, Analytics, Crashlytics)
- RESTful APIs
- OkHttp
- Material design
- MVVM architecture
- Git
- GitHub
- Agile/Scrum
- Push notifications

## Experience

● 09/2022 - Current  
Aryagami Cloud  
Services  
Hyderabad, IN

### App Developer

#### Responsibilities & Contributions

- Designed, developed, and deployed multiple **Android applications** for telecom and mobile service clients, including **Lyca Mobile Reseller, Infimobile User, and Tuvalu User** — all successfully launched on the **Google Play Store**.
- Built **native Android applications** using **Java** and **Kotlin**, leveraging **Android SDK, Jetpack Components (LiveData, ViewModel, Navigation)**, and **MVVM, MVP architecture** to deliver scalable and maintainable solutions.
- Integrated **RESTful APIs** using **OkHttp**, enabling seamless data exchange between client and backend systems.
- Implemented **Shared Preferences, Room Database**, for efficient local caching, session management, and real-time data synchronization.
- Worked with **Firebase Analytics** and **Google Analytics** to track app performance, monitor user engagement, and ensure app stability in production environments.
- Designed and optimized **UI/UX layouts** using **Material Design principles** and **custom XML components**, enhancing usability and visual appeal.

- Optimized **network calls, memory utilization, and thread management**, improving app load time by 30% and reducing crash rates through efficient lifecycle handling.
- Published, maintained, and updated Android applications on the **Google Play Store**, ensuring compliance with **Android 15+ (API 35+)** guidelines and modern privacy standards.
- Collaborated in **Agile/Scrum environments**, using **Git** for version control and coordinating cross-functional development with backend and QA teams.
- Gained hands-on experience in **iOS application development**, including **Swift, Xcode, and UI layout design**, contributing to cross-platform feature alignment and ensuring design consistency across Android and iOS applications.

## Education and Training

06/2022	<b>Bachelor of Technology</b> in Electrical, Electronics And Communications Engineering
Surampalem	Aditya Engineering College
04/2019	<b>Diploma</b> in Electrical, Electronics And Communications Engineering
Surampalem	Aditya College of Engineering And Technology
04/2016	<b>High School Diploma</b> in General
Kakinada	Aditya Public School

## Languages

**Telugu:** First Language

<b>English:</b>	C2	<b>Hindi:</b>	B1
Proficient (C2)		Intermediate (B1)
