Professional Summary

Aspiring Full Stack Developer with practical experience in PHP, Laravel, and Flutter, eager to design innovative and efficient digital solutions. Enthusiastic about learning new technologies, integrating AI-based automation, and contributing to impactful business applications.

Experience

Junior Developer, 08/2024 to Current

Mahesh Value Products Private Limited – Madurai, India

MVPL CRM – Dashboard:

- Spearheaded the design, development, and maintenance of the MVPL-CRM dashboard, enabling real-time management of products, customers, geography, sales hierarchy, norms, and transactions.
- Implemented dynamic modules for Brand, Category, Product Price, Customer Mapping, Sales Zones, and Territory Management.
- Developed and maintained RESTful APIs for the MSFA mobile app to ensure seamless backend–field data integration.
- Built and optimized complex UI structures, including TSO–TSR and TSO–ASM mappings, Route–Outlet, and Sales Growth tracking.
- Integrated business features such as Price Revisions, Tour Planning, Competitor Mapping, and Perfect Delivery Norms.
- Collaborated with teams for reports, logistics, marketing, and app settings modules.

HRMS:

- Designed and developed the Travel Claim module with AI tools (ChatGPT, DeepSeek) for automated claim assistance, reducing manual work by 60%.
- Built sub-modules for Allowance Structure, Claim History, Consolidated Reporting, and Multi-level Claim Approval.
- Automated employee application creation workflows using OCR and DigiLocker (Signzy) for secure Aadhar-based onboarding.
- Enhanced data accuracy, minimized fraud risk, and improved onboarding time with API-driven automation.

Sportsal (E-Commerce App):

- Developed a cross-platform mobile app using Flutter (frontend) and PHP (backend).
- Built reusable UI components, such as Product Card Widgets, Navigation Bar, and Sidebar, using BLoC state management.
- Implemented onboarding flow with OTP verification, PIN creation, and Aadhaar verification via Signzy API.
- Created an intuitive UI for Order Tracking, Order Summary, Product Details, and Profile pages with live data.
- Developed backend APIs for order tracking, product management, and user sync; added Cron jobs for real-time notifications.
- I built an admin panel in the Sportsal Dashboard for business users to manage products and operations.

Associate Software Engineer, 09/2022 to 03/2023**Great Innovus Solutions – Madurai****Forecasting**

I was working on a cloud-based ERP application (Food & Beverage ERP). Forecasting helps to plan for upcoming circumstances and keeps us ready to manage business efficiently and economically to satisfy demand.

- Setup the Daily Forecast Worksheet in the Forecasting App.
- Created reports and performed data cleanup for Daily Forecast tables.
- Customization of the standard Sales and Production module.
- Understanding business requirements.
- Creation of tables, pages, reports, and code units.
- Creation of automation test code units to test development.

Internship, 03/2022 to 08/2022**Great Innovus Solutions – Madurai**

Gained hands-on experience in various software programs, increasing proficiency, and expanding the technical skill set.

- I learned basic React.js during my internship while working on the HR Management application.
- Developed the front end using HTML and CSS.
- Managed employee personal details.
- Managed employee leave and absence.
