MAHENDRAN V

Backend Developer | Laravel Developer | PHP Developer

Motivated software developer with 1 year 6 months of experience working with PHP, Laravel, and foundational skills in Node.js and Java. Experienced in supporting React-based frontends by building robust backend services and APIs using Node.js and Java Spring Boot. Skilled in integrating frontend and backend technologies to create seamless, scalable, and efficient web applications. Eager to leverage full-stack capabilities and contribute to innovative development teams.

EDUC ATION

Msc (Information Technology)
Government arts college

07/2021 - 06/2023,   *Coimbatore, 75%*

Bsc (computer science)
Subramanya Arts & Science
College Palani.   *palani, 72%*

07/2018 - 04/2021,

WORK EXPERIENCE

PHP Developer | Backend Developer   *7/2024 - Present,*
Jayam Web Solutions   *Projects*

                                              Chennai, India

Nyraa – E-commerce Platform (In Development)
 Building an eCommerce website using React.js (frontend), Node.js (backend), and MySQL.
 Working on features such as user login, product management, and order processing.

Learning Management System (LMS)
 Developed and maintained an LMS with features like user authentication, content delivery, and progress tracking.

Million Minds – Job Portal
 Updated and developed new features for a job portal using CodeIgniter 4.
 Focused on service development, job posting, application tracking, and employer-employee interaction modules.

Taxi Booking System
 Developed a taxi booking application integrating Google Maps API for location tracking, distance calculation, and route optimization.
 Implemented SMS API for booking notifications and real-time updates.
 Built features to calculate tollgate charges based on routes using relevant APIs, enhancing accuracy and user convenience.

Content Management System (CMS)
 Designed and implemented CMS solutions to enable dynamic content updates and streamline website management.

Scalable E-commerce Platforms
 Built scalable eCommerce platforms integrating features such as product catalogs, shopping carts, order tracking, and payment processing.

Multivendor Web Applications
 Implemented multivendor platforms enabling multiple vendors to efficiently manage their stores, inventories, and orders.

Third-party API Integrations
 Integrated payment gateways (e.g., Stripe, PayPal, Razorpay) for seamless online transactions.
 Implemented SMS gateways to automate notifications and alerts for customers.
 Utilized Google APIs (e.g., Maps, Translation API, OAuth, reCAPTCHA) to enhance application functionality and security.

Cross-functional Collaboration
 Collaborated with cross-functional teams to gather requirements, define project goals, and deliver robust, user-centric solutions.

Database Management
 Worked with MySQL, PostgreSQL, and other databases to design and manage efficient data storage systems.

SKILLS

- Laravel
- CodeIgniter (v3 & v4)
- Core PHP
- Live wire
- Java
- Spring Boot
- HTML
- React.js
- JavaScript
- jQuery
- Bootstrap
- AJAX
- RESTful APIs
- JSON
- MVC Architecture
- Apache Server
- MySQL
- PostgreSQL
- JDBC
- JPA
- Git
- Postman
- Node js
- Composer
- Maven
- Docker
- AWS (EC2 & S3)
- DSA
- CSRF
- JWT
- OAuth 2.0
- Laravel Auth
- Session & Cookie

CERTIFICATES

PHP (08/2020)
Programming certificate

HackerRanks (06/2023)
Java Skill Test

NCCA-Certificate(02/2022)
Test & Characteristic certificate

HOBBIES

HackerRanks Problem Solving– 4 Stars (Hackos)

Logo design, Photo & Video Editing

Web design with animation

SOFT SKILLS
