MINI PROJECT IN UNDER GRADUATE

Title   :   Website for Sports Academy

Objective   :   To Create Sports Interest for people.

Language   :   HTML,CSS & PHP

BackEnd   :   MySQL

Description :   The purpose of this Sports Academy Website is to create awareness among the people about Sports and to improve their sportsmanship. People who join this Academy will be given Unique Credentials. Thereby, their profile and information about the games they have participated in can be stored in the database.

MAJOR PROJECT IN UNDER GRADUATE

Title   :   Website for Indian Silambam Academy

Objective   :   To create a Silambam Interest for all women and mens.

Language   :   HTML , CSS, JavaScript & PHP

BackEnd   :   MySQL

Description: The main objective of the Indian Silambam Academy is to train martial arts for women and men. This is the training center at Silambam Academy which is taught to everyone from children to adults. The Black Belt will be taught at the end of the training. These trainees can store their details on their Login Page and the Belt details they have learned, successful shows etc. in the Database. It can be used to compile the required information.

MAJOR PROJECT IN POST GRADUATE

Title   :   Kalaignar Veedu Valangum Thittam

Company   :   National Informatics Centre , Chennai.

Objective   :   Providing housing to the Below Poverty Line People through this scheme.

Language   :   HTML , CSS , JavaScript , Bootstrap & PHP

BackEnd   :   PostgreSQL.

Description :   This Kalaignar Housing Scheme is a scheme by the Government of Tamil Nadu to provide housing loans to people living below the poverty line. People have to give their details through the online form . These are stored in the database .These can be updated if required .This information is then verified by the government and only eligible persons are given credit. Information about the lenders will be obtained as a package.

Professional Experience

Title   :   Know Your Government (KYG)

Designation :   PHP Developer

Company   :   National Informatics Centre, Chennai.

Objective   :   Enhancing user experience and website functionality by implementing a new user environment and integrating new features .

Language   :   HTML , CSS , JavaScript , Bootstrap & Core PHP .

BackEnd   :   PostgreSQL.

Description :   Operating with two key divisions- The KYG Web Portal and the Department Website, each pivotal in driving our digital presence and serving distinct user needs.

The KYG site functions by displaying data directly on the web portal, providing users with convenient access to the information they need.

Content Management System :

It is a Formset for Uploading Data.

Actually CMS having 3 Levels.

Within the CMS framework, the **first level** is designated for **users**.

Users havethe ability to input data via forms and subsequently submit it to the publisher for further processing.

The **second level** encompasses the **Publisher** role within the CMS. Publishers are responsible for verifying all submitted details. If the information is deemed inadequate or incorrect, it is returned to the user for revision. Users can then make necessary alterations and resubmit the data to the Publisher. Once the content is verified and approved, the Publisher has the authority to publish it.

The **third and final tier** is the **Admin** level within the CMS. Admin possess exclusive access to essential functionalities such as adding or deleting critical content, accessible only through Admin login credentials. Admin have the authority to create and edit user accounts, including password management. Moreover, the Admin role encompasses the ability to directly manipulate vital components such as headers, footers, menus, image sliders, and announcements without requiring Publisher intervention. Admin can publish content directly without the need for intermediary approval.

Once the user approves the design, development proceeds, and all published content is displayed on the website according to the design specified in the Web portal. This ensures seamless integration of approved content into the website's layout and structure.

FIXED SECURITY AUDITING VULNERABILITIES

- ➢ Directory Listing
- ➢ Session Fixation
- ➢ Double Extension Upload
- ➢ Stored XSS Injection
- ➢ Data Hijacking
- ➢ Long String Attack
