MUKESH ANANTH.R

Full Stack Developer

PROFILE

Full Stack Developer with **2 years** of experience in designing, developing, and deploying scalable web applications. Strong expertise in C#, ASP.NET Core, Web API, MVC, Razor Pages, and modern front-end technologies. Skilled in working with SQL Server, PostgreSQL, and Oracle databases. Experienced in building high-performance APIs, developing dynamic and static web applications, and solving complex technical challenges. Passionate about continuous learning, clean architecture, and delivering user-centric solutions in fast-paced environments.

WORK EXPERIENCE

Company Name : DSM Soft Pvt . Ltd

Designation : Senior Software Developer

Duration : March 2024 to Present

Responsibilities :

- Led the development and architecture of ASP.NET Core Web API solutions, improving data exchange efficiency across internal systems.
- Built and optimized scalable API components, enhancing request/response performance and reducing latency for end users.
- Developed a DSM Component Management website using ASP.NET Core MVC, enabling seamless browsing of server-side and client-side components.
- Contributed to a Live Vehicle Tracking and Performance Monitoring System using ASP.NET Core MVC and Leaflet.js, implementing real-time map visualization, route plotting, and vehicle performance analytics to enhance operational insights.
- Developed a Desktop Git Automation Tool enabling users to execute Git operations (Clone, Pull, Push, Merge, Revert) through an intuitive interface by specifying source and target repository paths.
- Built the application using C# for the UI layer and integrated Python scripts to programmatically perform Git commands and automate workflows. Automated Git workflows, improving ease of use and reducing manual command-line operations for the team.
- Developed a custom Code Audit Desktop Application using SonarQube, implementing organization-specific rules by building C# class-library DLLs to override default SonarQube rules; enabled multi-language code analysis including VB.NET, Python, and JavaScript.
- Collaborated with cross-functional teams to deliver high-quality, production-ready features aligned with business needs.

Company Name : MarlenSoft Pvt Ltd

Designation : Product Engineer Trainee

Duration : Aug 2023 to Nov 2023

Responsibilities :

- Developed a precision measurement device application using ASP.NET Core to automate data processing and improve operational accuracy.
- Built internal applications, including a real-time chat system using Signal-R, enhancing internal communication within the team.
