Cheyyur**

2015-2016 | Percentage- 86.5%

PROFILE

Motivated **Flutter Developer with 2 years** of hands-on experience in building cross-platform mobile and web applications. Proficient in UI/UX design, **REST API integration, Firebase services**, and state management . Skilled in deploying applications for **Android, iOS, and Web**. Seeking to leverage expertise to contribute to a dynamic development team and build high-performance, scalable applications.

WORK EXPERIENCE

Accel Limited

June 2023 – Present

Developed **QuickBill** a cross-platform Invoice Billing application using Flutter, designed to streamline **billing and invoicing processes** for small businesses. The app features a clean, responsive UI with smooth navigation and supports both Android, iOS, and Web platforms.

- Integrated **RESTful APIs to manage customer data**, invoices, and payment records.
- Implemented **Firebase Authentication** for secure user login and registration.
- Integrated **push notifications** using Firebase Cloud Messaging for real-time updates.
- Created dynamic charts and visual analytics to display sales and billing data.
- Developed functionality to generate and **download invoices as PDF files**.
- Ensured **performance optimization and error handling** for a stable user experience.

Jewellery shopping app

Project Name :GoldElegance

- Built a mobile jewelry shopping app using Flutter with **real-time pricing and cart functionality**.
- Integrated **Firebase Firestore** to store product listings, images, and user cart data.
- Used **Firebase Authentication** for user login and registration with email/password.
- Created dynamic product detail pages with live price calculation
- Developed add to cart functionality with local and **Firestore sync for persistent cart state**.
- Ensured full cross-platform compatibility (**Android & iOS**) with responsive layouts.
