## PROJECTS

### Saarc Masts Tech | College ERP & LMS

Developed and maintained a comprehensive College ERP (Enterprise Resource Planning) System to automate and streamline academic and administrative processes such as student enrollment, attendance, fee management, examination, and staff management. The system provided real-time insights, improved efficiency, and reduced manual errors through centralized data handling.

#### Key Features:

- Student admission and profile management
- Fee collection and payment tracking
- Attendance and timetable scheduling
- Examination and results module
- Course creation and content upload
- Student enrollment and progress tracking
- Assignment submission and grading
- Role-based access for admin, faculty, and students
- Real-time reports and analytics dashboard

#### Tech Stack (example):

Laravel | PHP | MySQL | jQuery | Bootstrap | AJAX | REST API

### Vinsup Infotech | Vinsupdigital

Vinsupdigital is an online QR-based food ordering system (FOS) for customers. This system supports both pickup and advanced booking options through a web application. It manages item availability based on each client's open and close times. The system includes live notifications for users and allows multiple orders from different users to be handled separately. Additionally, it integrates SMS, WhatsApp, and email notifications for various users.

Account Name - Vinsup Infotech (Own Product).

Tool - PHP Laravel, MySQL, GIT.

Url - <https://vinsupdigital.com/>

### Vinsup Infotech | POS (Billing)

The POS Billing application supports multiple authenticated users and manages each user's account. It tracks daily sales and handles billing for separate branches, generating reports for each user. The application categorizes bills by payment methods (cash, card, and online) and calculates the GST amount, splitting it across the different bills.

Account Name - Vinsup Infotech (Own Product).

Tool - PHP Laravel, MySQL, GIT.

Url - <https://pos.haribiriyani.in/>

### **Vinsup Infotech | FMS (Facility Management System)**

FMS is an online cleaning process management application for multiple users and organizations. It monitors allocated work schedules using a QR-based scanning option, which can only be done within a specified time window. If the time exceeds this window, scanning is not allowed. In case of any product damage, users can upload pictures to report snags, including the date and time of the incident.

Account Name - Vinsup Infotech (Own Product).

Tool - PHP Laravel, MySQL, GIT.

Url - <https://vinsuppro.in/>

#### **Responsibilities**

- Handling Frontend and Backend.

### **AMYPO Tech Pvt Ltd | Edutech**

Online Quiz Portal is a web-based platform designed to facilitate the creation, management, and participation in quizzes. It allows users to take quizzes on various subjects and skill levels, providing instant feedback and results. Administrators or educators can create customizable quizzes with different question types, including multiple-choice, true/false, and short answer. The platform supports timed quizzes, automatic grading, and detailed reporting for performance analysis. Users can participate from any device with internet access, making it ideal for educational institutions, corporate training, and competitive exams.
