

SUMMARY

Highly skilled Power Platform Developer with expertise in Power Apps, Power Automate, SharePoint, and Power BI. Proven track record of designing and implementing customized applications and automated workflows that streamline business operations, improve data management, and enhance collaboration. Adept at integrating SharePoint data with Power Apps and Power Automate to optimize business processes and drive efficiency. Strong background in Power BI to transform complex data into actionable insights through interactive reports and dashboards. Passionate about leveraging Microsoft technologies to empower organizations, improve decisionmaking, and enhance overall operational performance.

KEY SKILLS

- Data Analysis • Power Apps Development • Power Automate Workflows • SharePoint Integration • Power BI Data Analysis
- Data Visualization • Data Mining • Canvas App Design • Process Improvement • Team Incubation

TECHNICAL SKILLS

Languages/Tools: Power Apps , SharePoint , Power Automate, Power BI, Canvas

Database: Excel, MS SQL Server, MySQL, PostgreSQL

MS Excel (Advance)

PROFESSIONAL EXPERIENCE

Power Platform Developer & Business Intelligence Analyst

Mar 2023 - Present

GVM CORNERSTONE EXPORTS INDIA PRIVATE LIMITED

Hyderabad

Power Apps Development: Designed and deployed custom applications to streamline business operations, enhance user experience, and automate data management processes. Integrated Power Apps with SharePoint to create intuitive, user-friendly interfaces for data input, approval processes, and reporting.

- Developed custom business applications using Power Apps integrated with SharePoint to streamline operations across multiple departments.
- Pulled real-time **Shopify Order, Product, and Customer data** into SharePoint using Power Automate (HTTP + Shopify Admin API), reducing manual data entry and improving data accuracy.
- Automated email alerts and reminders for **cancelled, returned, and damaged beauty product orders**, notifying Accounts, Customer Support, Warehouse, and Dispatch teams.
- Created scheduled flows to monitor Shopify order status changes and update SharePoint automatically.
- Designed department-specific applications for Dispatch Orders, Order Packing, Returns, Replacements, and Inventory Management, enhancing operational efficiency.
- Built Power BI dashboards to track sales, export performance, order flow, and team productivity using DAX and Power Query.
- Implemented automated approval workflows, exception alerts, and real-time notifications to improve visibility and reduce processing delays.
- Trained internal users and optimized Power Platform workflows for company-wide adoption.

Interview & Recruitment Management System :

Built an end-to-end Interview & Recruitment Management System using Power Apps, SharePoint, Power Automate, and Outlook.

- Automated full candidate lifecycle (Applied → Screening → Second Round → Final Round → Documentation) with dynamic HTML email templates, reminders, and status-based triggers.
- Created automatic flows to send interviewer/candidate reminders, schedule interviews via Outlook, and update SharePoint records based on interview outcomes.
- Implemented document verification automation by storing resumes and candidate documents in SharePoint while updating list items through Power Automate.
- Developed a Leave Management System with manager approvals, automated Outlook Calendar booking using **Create Event (V4)**, and structured email alerts.
- Integrated Microsoft Forms → Power Automate → SharePoint pipelines for seamless candidate entry, interview tracking, and workflow automation.

Power Platform Developer

Client : SKM RMC:

Hyderabad

Developed a low-code, scalable digital platform to automate end-to-end operations of a Ready Mix Concrete (RMC) plant across multiple locations, supporting role-based access and mobile-friendly interfaces.

Key Features:

- **Management Dashboard:** Real-time insights on production, expenses, stock, and approvals via Power Apps and Power BI.
- **Plant Operations:** Auto-generated delivery challans, batch timing logic, moisture logging, and printable reports using Power Automate.
- **Accounting & Purchases:** Expense tracking, salary management, vendor approvals, GST-based invoicing, and low stock alerts.
- **Attendance:** Role-based check-in/out, holiday validations, and site-specific attendance tracking.
- **Automation & Print Logic:** Auto PDF generation, timer-based screen flows, and document uploads to SharePoint.
- **Reporting:** Embedded Power BI dashboards for plant performance, cost analysis, and profitability.

Business Impact:

- Reduced manual errors by **90%**
- Cut approval times from **days to hours**
- Centralized multi-plant operations in one system
- Enabled audit-ready traceability and real-time monitoring

Power Platform Developer

Client: HBMC Construction

Hyderabad

Key Responsibilities:

- Digitized **material tracking, daily labor entry, and vendor billing** using Power Apps, SharePoint, and Power Automate.
- Developed apps for **purchase logs, rental tracking, and bi-monthly vendor summaries** with automated advance calculations.
- Created **Power BI dashboards** for:
 - Labor & material costs
 - Project completion tracking
 - Vendor-wise billing
- Automated **PDF generation and email notifications** for bills and approvals.
- Built **client-facing Power Apps portal** for real-time project status and budget tracking.
- Added **Project Time Management** to monitor delayed/on-time activities via Power BI visuals.

Power Platform Developer
Client : Amritdhara Hospital

Mar '24 - Aug '24
Bargarh, Odisha

Responsibilities & Contributions:

- Developed a complete Hospital Management System with modules for Reception, Pharmacy, Lab, Billing, and Owner Dashboard.
- Created SharePoint data structure for patients, visits, surgeries, admissions, medicines, lab tests, and billing.
- Built Power Apps screens for patient registration, IPD/OPD flow, surgeries, room allocation, pharmacy stock, lab test entry, and billing.
- Implemented auto-generated MR/VR/IP numbers and real-time data handling using Patch(), LookUp(), and Filter().
- Added role-based login for Reception, Pharmacy, Lab, and Admin users.
- Automated PDF receipts and discharge summaries (OPD, IPD, OT, Billing) using Power Automate.
- Designed an Owner Dashboard showing revenue, patient flow, pharmacy/lab income, and daily/monthly stats.
- Improved operational accuracy with search filters, structured PDF formatting, and linked billing visibility (MR/IP level).
