- Effective communication
- Team collaboration
- Leadership
- Dynamic Adaptability

Education Background

- Virudhunagar Hindu Nadar Senthikumara College

Bachelor of Computer Science - CS

Completed in 2024

- Government Higher Secondary School

Completed in 2021

About Me

Software Developer with 1.5 years of experience in designing, building, and deploying high-quality applications using modern software engineering practices. Strong in developing scalable, highly available backend systems and interactive mobile/web applications. Passionate about solving customer-centric problems, improving performance, and delivering reliable software. Seeking to contribute to Amazon's International Emerging Stores Payments (IESP) team by building secure, durable, and high-volume distributed systems.

Professional Experience

Software Developer | Present

Peacock Design Solutions

- Project Management System - Built a complete project management platform in
- Laravel with backend architecture, APIs, user roles, workflows, reports, and full deployment.
- Embroideries of Kutch Website - Developed a full e-commerce platform with
- backend, payment integration, hosting configuration, and live deployment.
- Taxi App Backend - Created the full Laravel backend for a taxi booking app, including driver/user modules, ride management, real-time APIs, and production deployment.

Software Developer | 2024-2025

Xmedia Solution

- Developed and maintained web applications using Python ensuring optimal performance and user experience
- Implemented AI prompt engineering for customized solutions, increasing task automation and efficiency.
- Collaborated with cross-functional teams to integrate PhiData RAG using python.
- Demonstrated effective communication and leadership skills, mentoring junior developers and coordinating projects.
- Gen AI Knowledge (Generative AI concepts, integration with development processes)

Achievements

2024 Salesforce Integration Tools - SOQL query optimization and Postman testing. L&T API Modules - Using .NET for backend services

2025 Financial Literacy Platform - A Laravel-based platform for educating users on money management.
