PROFILE

Full-Stack Developer (Laravel & React) with 2.5+ years of experience building SaaS systems, multi-tenant applications, and scalable eCommerce platforms. Strong expertise in REST APIs, AWS automation, multi-role permission systems, advanced discount engines, and secure authentication (JWT, RBAC, 2FA). Experienced with Stripe, PayPal Checkout SDK, and Zoho Billing integrations.

CORE SKILLS

- **Backend:** PHP, Laravel 9/10+, REST APIs, Queues, Jobs, Multi-Tenancy
- **Frontend:** React (Basics), JavaScript, HTML5, CSS3, AJAX
- **Database:** MySQL, Query Optimization, Indexing, Migrations, Seeders
- **AWS:** CloudWatch, API Gateway, Elastic Beanstalk Deployment
- **Payments:** Stripe, PayPal Checkout SDK, Zoho Billing
- **Security:** JWT, RBAC, 2FA
- **E-Commerce:** Variants, Bundles, Tier Pricing, BOGO, Role-Based Pricing
- **Tools:** GitHub, API Documentation

ACHIEVEMENTS

- Improved bulk product import performance by 60% using optimized DB operations.
- Built a scalable multi-role permission system (Admin, Subadmin, Tester, Editor).
- Automated AWS API Gateway usage tracking with Zoho Billing integration.
- Implemented JWT authentication with 2FA for enhanced security.
- Developed a robust product configuration engine with variants and tier pricing.

PROJECTS

Buyience — AI-Driven Multi-Tenant B2B Platform

Laravel

buyience.com

- Developed 600+ REST APIs covering authentication, product modules, orders, discount engines, and user roles.
- Built complete multi-tenant architecture with isolated databases and automated onboarding.
- Implemented product variants, configurations, inventory sync, and bulk updates.
- Integrated AWS CloudWatch & API Gateway for tenant-wise API usage analytics.
- Added AI modules: auto product description, category suggestions, pricing automation.
- Developed advanced discount systems including BOGO, Bundles, Tier Pricing, and Role-Based Discounts.

PROJECTS (CONTINUED)

Client Project — Nova Technologies (Training)

Core PHP

3 Months

- * Worked on a fully dynamic website where home page, services, and content were editable from admin panel.
- * Developed backend modules for dynamic sections including titles, descriptions, service content, and images.
- * Implemented admin panel validations, content management, and data workflows.

GivensMD — Medical Service Platform

Core PHP

Client Project

- * Built Contact Page functionality to send emails to admin.
- * Created APIs to save contact form data into the database.
- * Built GET API endpoints to fetch saved contact form submissions.
- * Implemented UI changes and client-requested updates on forms and frontend components.

Tour & Travel Agency Management System

School Project

- * Developed package listings, itinerary management, and booking workflow.

Appna Learning Platform (Interview Prep Website)

School Project

- * Built a subject-wise and topic-wise platform to learn interview questions for multiple categories.
- * Designed question browsing modules for categories and topics to help students prepare.
