PROJECTS

Global HRMS (08/2024 - Present)

- Currently working on the **Global HRMS** platform, a comprehensive HR management solution built with **Laravel** and **MySQL**. The system streamlines HR operations, payroll, attendance, and employee management while ensuring secure and efficient data handling.
- Implementing **modular service-layer architecture** for maintainable and reusable code.

Valiant RealEstate (04/2025 - 07/2025)

- Built a Laravel-based real estate management system with a service-layer architecture, ensuring clean, reusable code and efficient property, client, and operations management.
- **Visitor Booking System** – Developed functionality for scheduling and managing property visits with status tracking.
- **Ticket & Follow-Up System** – Implemented a structured workflow to log, track, and resolve user or client issues.
- **Rewards Module** – Built a points-based reward system for clients/agents based on activity and milestones.
- **Project Inventory Management** – Created modules to manage property/project details and availability in real time. etc...
