- Integrated multiple blog categories (Food, Health, Sports, etc.) into one centralized platform.
- Enabled category selection during posting, ensuring organized and filterable content display.
- Built the frontend using HTML, CSS, JavaScript, and React JS for an interactive user experience.
- Developed the backend with MySQL to manage post submissions, routing, and database operations.
- Improved skills in full-stack development, UI/UX design, and category-based content management.

Stock Price Prediction

03/2024 - 06/2024

A stock price prediction project utilizing dataset analysis

Technologies: Python Flask, Pandas, Matplotlib

Algorithm: LSTM, Linear Regression

- Built a predictive model to forecast stock prices using historical market data.
- Cleaned, preprocessed, and analyzed datasets to identify market trends and insights.
- Applied Python libraries (Pandas, Matplotlib) for data handling and visualization.
- Implemented machine learning models (Linear Regression, LSTM) for time series for
- Evaluated model accuracy using error metrics and fine-tuned parameters for improvement.
- skills in financial data analysis, forecasting, and real-world data-driven decision making.

INTERNSHIP

Java

Bey wise

 8/2024 - 10/2024

- Completed a Two-month internship focused on core Java programming concepts.
- Applied OOP principles, exception handling, collections, and file I/O operations in real tasks
- Worked on mini-projects and debugging activities to strengthen problem-solving skills.
- Gained hands-on experience using Eclipse IDE for Java development and testing.
- Learnt Git for version control and improved ability to design, implement, and debug Java applications.

CERTIFICATE

Bey wise

- Completed a Two-month internship focused on core Java programming concepts.
- Applied OOP principles, exception handling, collections, and file I/O operations in mini-projects

NPTEL

- Gained practical understanding of core management principles, including planning, organizing, and decision-making.
