

Shyamsundar Pushpad

PHP Developer | Laravel & Full-Stack Expertise | Scalable Web Applications
Bangalore | sspushpad.nitkkr@gmail.com | 9806586009

WORK EXPERIENCE

Senior Software Developer - Qinecsa Solutions

Feb 2023 - Aug 2024

- **Led development** of a **Laravel-based web application**, improving query performance and achieving **90% user adoption**.
- Participated in **code review** and followed **Agile methodology** improving **code quality and development** efficiency.
- Worked with Git, TFS, Azure DevOps and remote server management (Putty).
- **Designed scalable MySQL schemas**, improving application **load time and efficiency**.

Software Developer - Juniper Networks (Adecco)

Aug 2022 - Jan 2023

- **Developed & Enhanced** MFG-TDS System for **Monitoring test manufacturing builds**.
- Optimized API performance, reducing data processing time by **20%**.
- **Automated cron jobs**, optimizing batch processing and reducing manual intervention by **40%**.
- **Managed version control** with **Bitbucket**, ensuring efficient collaboration and seamless code integration.

Software Developer - IBM (GITS)

Apr 2021 - Aug 2022

- **Developed and enhanced** WorkTrack Tool for Tracking AT&T orders.
- Contributed to an **application migration** project, utilizing tools like **Docker, GitLab, Rally, JIRA** for efficient deployment, version control, and project management.
- Ability to solve RITS tickets of the Work Track tool of AT&T.

PHP Developer - NIC - MeitY (Velocis & JKT)

Sep 2019 - Apr 2021

- Designed and **developed dynamic CMS websites**, focusing on user-friendly interfaces, seamless content management, and responsive design.
- Developed and **integrated RESTful APIs** using CodeIgniter, ensuring efficient data communication.
- **Optimized web functionality**, improving **data retrieval speed** and workflow efficiency.

PROJECT

PVtrace

- Developed core backend features for PVTrace, a Pharmacovigilance medicine safety tracking system used by clinicians and regulators. Implemented automated reporting & data analysis, improving efficiency in tracking medical cases.

mfg-tds.juniper.net

- Worked on back-end development for mfg-tds, a tool which use to manage and keep track manufacturing test builds data for various Juniper Programs.

Caixa Bank

- In this project, I was involved in application migration, where we migrated applications from Caixa to IBM servers. The team utilized tools such as Docker, Git, and Rally for efficient deployment, version control, and project management.

Work Track

- Developed and optimized WorkTrack, AT&T's workTrack tool centralized order management system. Improved order processing efficiency and enabled seamless team updates.

ngo.meity.gov.in

- Worked on back-end development for NGO meitY , a Website manages Research & Development Project for NGO(Non-Government Organization). NGO can apply for projects cost and track the Request.

SKILLS

Languages : PHP, JavaScript

Framework : Laravel, CodeIgniter

Tools : Git, Azure, Jira, Docker, Rally

Databases : MySQL, PostgreSQL

Frontend : HTML5, CSS, React, jQuery

Other : RESTful APIs

EDUCATION

Master of Computer Applications, NIT Kurukshetra, Haryana.

CGPA : 7.0

2015 - 2018

Bachelor of Computer Science, Vikram University, Ujjain, MP.

Percentage : 65%

2011- 2014

ACHIVEMENTS

- Secured **AIR 576** in **NIMCET 2015**
