Mobile no: 7550018467

PROFESSIONAL SUMMARY

- 2+ Years of experience in ASP .Net Core.
- Having relevant experience in SQL server (VIEW, STORED PROCEDURE and TRIGGER).
- Experience in Team Foundation Server (TFS) for end to end development.
- Designing, developing, testing, troubleshoot and debugging of the application
- Experience of multiple Login setup
- Having good experience in UI Development as well Bootstrap, Jquery, JavaScript, CSS 3, HTML 5.

Company	:	**PracticeVantage**
Project	:	**https://velsgroup.in/**
Platform	:	**ASP .Net Core, C#**
UI front end	:	**HTML5, CSS3**
Back-end	:	**SQL server**
Year	:	**Apr 2023 – Jun 2025**

About the Project

In this project, we are maintaining a **multi-login system** with separate access for **Admins** and **Teachers**. The **Admin login** is used to update all important website information such as Annual Day, Sports Day, upcoming school events, and media-related updates, since Vels Group is well known in the media industry and often shares upcoming movie details on the site. The **Teacher login** is focused on student-related updates, where teachers can upload event-winning photos, students' winning moments, achievement details, class toppers, and other activity highlights. This structure helps the school easily manage both official announcements and student achievements, while keeping the website active, organized, and regularly updated.

Responsibilities

- Implementing the View on SQL Server.
- Admin Login – Complete Website Content Management(Add / Edit / Delete Events)
- Teacher Login – Student-Related Content Updates(Add / Edit / Delete Events)
- Maintaining the Team Foundation Server.

Company	**:**	**PracticeVantage**
Project	**:**	**https://3ci.in/**
Platform	**:**	**ASP .Net Core, C#**
UI front end	**:**	**HTML5, CSS3**
Back-end	**:**	**SQL server**
Year	**:**	**Apr 2023 – Jun 2025**

About the Project

In this project, 3Ci (3ci.in) is a business-information and company-ranking website that works like an online directory. It lists companies from different industries in India and gives them a score or rank based on its internal data model. The site allows users to view "best companies by industry," compare businesses, and explore company details such as category, ranking, and basic information. It is not a single-company website but a platform that collects and displays information about many organizations. Overall, it functions as a business-listing and rating portal that helps users search for companies and see how they are ranked within their industry.

Responsibilities

- Implementing the View on SQL Server.
- Admin Login – Complete Website Content Management(Add / Edit / Delete Events)
- Implementing the Ajax Pagination for quick loading
- Maintaining the Team Foundation Server.

QUALIFICATION

Bachelor of Engineering - Electronics and Communication Engineering

Aggregate	: 7.81
University	: Anna University
Institution	: Saranathan College Of Engineering
Year of passing	: 2021
