Professional Summary

Detail-oriented .NET Software Developer with 1 year of experience specializing in Web API, ASP.NET MVC, SQL Server, and .NET Core. Strong expertise in API development, database optimization, and modular HRMS/ERP systems. Skilled in building scalable back-end services, secure data operations, and interactive front-end components. Seeking opportunities to apply technical expertise and contribute to high-quality software solutions.

Work Experience

Software Developer — Ganesh Industries Services Pvt. Ltd.

Jan 2025 – Dec 2025 | Baramati

- Developed major HRMS modules (Employee, Attendance, Leave, Payroll) using ASP.NET MVC & .NET Core.
- Created multiple RESTful Web APIs for employee onboarding, attendance logs, salary generation, and approval workflows.
- Worked extensively on SQL Server queries, stored procedures, indexing, views, and performance optimization.
- Integrated HR operations with API-driven architecture ensuring secure and fast data transactions.
- Developed reusable UI components using JavaScript, jQuery, Bootstrap, and MVC.
- Implemented validation frameworks, clean code practices, and handled end-to-end module deployment on IIS.
- Worked closely with cross-functional HR teams to gather requirements, test modules, and deliver enhancements.

Projects

HRMS – Human Resource Management System

- Developed HR workflow modules including Employee, Attendance, Leave, and Payroll.
- Implemented RESTful APIs for leave approval, salary calculation, attendance tracking, and employee profile sync.
- Created SQL schema, optimized joins, stored procedures, and indexing for faster data processing.
- Built UI forms and validation layers using MVC, jQuery, and Bootstrap.

Technical Skills

- ASP.NET Web API
- ASP.NET MVC
- Angular 12 (Basics)
- .NET Core
- JavaScript, jQuery
- ADO.NET, XML
- SQL Server 2019 (Stored Procedures)
- Bootstrap, HTML, CSS
- Git, IIS Deployment
