EDUCATION

• BTech in Information Technology YCCE, Nagpur | GPA: 7.34

Maharashtra, India Jul 2020 - Jul 2024

EXPERIENCE

Fendahl International Nagpur, India

Software Engineer | C#, SQL Server, Javascript, .Net 5, MVC, EF Core, AJAX, REST API, SignalR

Jan 2025 – Present

- Market Data Module: Developed and maintained the market data module, an important section of trade that regulates the price
 history and their changes for each curve. Optimize data handling and validation logic. Reduced defects count by 50%, enables users
 to create trades smoothly based on reliable market data.
- Optimized Data Grid Performance: Reduces layout rendering time by 20% in Devextreme DataGrid by implementing asynchronous API calls. Additionally, implemented server-side pagination ,enabling users to navigate data seamlessly by page size.
- **Performance Optimization & Caching :** Improved code reusability and reduced redundant API calls by implementing in-memory caching and Redis Caching, Resulting 15% faster server response time.
- Implemented AES Encryption for network calls between frontend and backend, ensuring secure transmission of sensitive trade data. Achieved 100% encryption coverage, reducing identified vulnerabilities in penetration testing.

Software Engineer Trainee | C#, SQL Server, Javascript, .Net 5, MVC

Jul 2024-Jan 2025

- Independent Module Ownership: Integrated the import and export functionality to the existing application and enhance the functionality of layout changes and reduce the layout change time by 50 %, enables users to smoothly switch between the layouts.
- Module Enhancements: Developed and integrated a Financial Statement Reference module to streamline the execution of paper and physical trades, reducing manual effort and enabling accurate tracking of user transactions throughout the trade cycle.

Software Engineering Intern | .Net 8 , EF Core , C#

Feb 2024 - Jul 2024

Led a team of 21 interns, orchestrating project delivery and ensuring on-time, high-quality output. Participated in system architecture
and database tuning. Took ownership of Human Resource Management System (HRMS) modules including User Profile, Leave
Management, and Attendance Tracking

PROJECTS

 $\textbf{CHATBOT} \mid .Net \ 9, \ Python \ , \ \textit{VectorDB} \ , \ \textit{Qdrant} \ , \ \textit{OpenAI API} \ , \ \textit{REST API} \ , \ \textit{C\#} \ , \ \textit{Docker}$

<u>Github</u>

- Developed a product-specific AI chatbot leveraging the Retrieval-Augmented Generation (RAG) architecture.
- Optimized structured product json into flat text summaries for semantic embedding and reducing network payload by 20 %.
- Developed a Python-based microservices using Flask and SentenceTransformers (MiniLM-L6-v2) to generate local text embeddings
- Stored and managed high-dimensional vectors in **Qdrant**, enabling efficient semantic search and similarity-based product retrieval.

SkILLS

Technical & Cloud Skills: C#, Python, C++, JavaScript, SQL, Bootstrap 4, PostgreSQL, Redis, Git, Agile, Typescript, Responsive UI Azure Fundamental (Azure Storage, Azure Function, Azure VM's, Azure SQL, Azure App Service, Load Balancer, VNets).

Frameworks and Libraries: .NET Core, React Js, Entity Framework Core, SignalR, ADO Dotnet, jQuery, Redux. Next Js

Soft skills: Technical Communication, Cross-Team Collaboration, Ownership, Accountability.

ACHIVEMENTS

• Microsoft Azure Fundamental (AZ 900), Mircrosoft | Nov 2025
