Bhubaneswar, Odisha, 751001

OBJECTIVE

Full Stack Developer with 1.8 years of experience in web application development. Proficient in PHP, Laravel, React, Node.js, and MySQL. Skilled at leveraging AI tools and modern technologies to build scalable, efficient, and innovative solutions.

SKILLS

- **Languages/Frameworks:** PHP, Laravel, Node.js, Express.js, React.js
- **Web Technologies:** HTML, CSS, Java Script, Bootstrap, Tailwind CSS
- **Database Systems:** MySQL, Oracle, MongoDB
- **Tools:** VS Code, Github, DBeaver, Postman, Firebase, Superbase, Vercel

EXPERIENCE

- **IIG Technology** *Present*
  Software Developer Bhubaneswar, Odisha

Key Contributions:

• Designed and delivered enterprise-level web applications across multiple domains, including ERP, CRM, healthcare, HRMS, e-commerce, education, and real-time tracking.

• Developed scalable, responsive applications using PHP, Laravel, React.js, Node.js, and Next.js.

• Optimized application performance & databases, reducing load times by 20–30%.

• Deployed solutions on AWS & shared hosting, ensuring uptime, security, and scalability.

• Worked closely with stakeholders to deliver custom client-specific features with high adoption rates.

Major Projects:

• HRMS (Human Resource Management System): Employee management, leave tracking, payroll, and attendance modules.

• School ERP: Built student management, attendance, results, and fee tracking modules for educational institutions.

• E-commerce Platform: Product catalog, cart, wishlist, order management, and payment integration with secure checkout.

• Hospital Management System: Patient registration, appointment scheduling, billing, and reporting.

• Tracking App (PWA): Real-time location tracking with user/admin dashboards.

• Event Management System: Event registration, scheduling, ticketing, and reporting features for clients.

• Content Management Tools (CMS): Dynamic content management for websites and applications.

• CRM (SuiteCRM Customization): Workflow automation, custom modules, third-party API integration (reduced manual effort by 30%).

• OpenEMR Customization (Healthcare): Performance tuning, SuiteCRM integration, and PWA development for doctors/patients.

EDUCATION

- **MCA | Gandhi Institute for Technology (2022 – 2024) | CGPA: 8.3**
- **B.Sc | Kendrapara Autonomous College (2018 – 2021) | CGPA: 7.88**
- **+2 | BCCST (2016 – 2018) | 66%**

ACADEMIC PROJECTS

- *Leave Management System – Java & MySQL-based portal for leave requests with analytics reporting.*
- *Online MCQ Test – Oracle-backed quiz system with instant feedback and performance reports.*
- *Pharmacy Shop Management System – PHP & MySQL solution for managing pharmacy inventory, sales, and customers.*
