WORK EXPERIENCE

Software Developer
Nethues Technologies Pvt. Ltd

01/2020 - Present   *Delhi,India*

Achievements/Tasks

- To be a part of agile scrum call and understand the requirement.
- To be a part of client calls for backlog refinement.
- To be a part discuss if any team member has any kind of blocker.
- I have made Drawers project individually and this project is all based on Prestashop, JavaScript, and Jquery.
- I take care of creating and maintaining sites.
- Worked individually on some projects which are based on various technologies.
- Implemented modules using Nodejs, JavaScript, Bootstrap, HTML5, CSS3, etc.
- Worked on a small weather app with node JS and using node JS modules. I have used third-party API and this app shows the current temperature and time of the specific area. And created a project for water supply: It is forum in which users can fill out the form for the water supply in a particular area, for a particular reason, and at what date (for construction, drinking, etc..).All the information is filled in the allowed form.
- Create many scripts using PHP,Prestashop, Laravel for the data form and for adding products in the shop. Solving bugs and placing some payment modules. Communicate with the client regarding the project on chat.
- Developed a feature-rich back office using Laravel framework, providing seamless website management capabilities with an intuitive user interface. The back office includes essential functionalities like content management, user management, and data analytics.

Tools/softwares/Technologies : Sublime, Vscode, Nodejs, PHP, Laravel, JS, Mysql, ubuntu linux, Basecamp, MailChimp

ACHIEVEMENTS

Nethues Technologies Pvt. Ltd

Achievements

- Got praised with the Achiever tag on Operation Teams by Product Manager.
- Got praised by Achiever tag on Operation Teams by Senior Technical Lead for meeting the commitments and timelines of critical bug cum feature. Which is also appreciated by the CLIENT.

Bachelor of Technology (CSE)
GITAM Collage, Haryana

08/2015 - 06/2019   *Haryana, India*

SKILLS

PHP | Laravel | Prestashop (CMS)
Rest Api | Javascript | Ajax | Jquery
MySql | HTML | Bootstrap | Github

PROJECTS

Spa Voucher (Laravel)

- In this a user can create a voucher for their loved ones the user can select how they wants to send the voucher to the other person by using post card or by using email. And on the other hand the voucher will be used only for the selected hotel respectively and get the discount in booking.
- For this user can contact location directly to make a reservation. Be sure to let them know that you are using a Hotel & Spa Gift Voucher as payment before booking or simply hand over your Hotel & Spa Gift Voucher when you arrive.

Super App (Laravel)

- Within this project we are going to build a small "betting" application where in a nutshell users can input their "bets" for a Lotto game and the admin can manage the results of the game, players, Player game balances etc.
- With the super app we are basically going to play a version of the "Lotto" where the players places his bet on a few numbers, every Saturday after 16:00 the numbers from the Lotto are being pulled (externally done, not within this app) and the 6 winning numbers are shared the application calculates the winners and provides updated balances based on the bets the admin can also export the results for storage.

DRAWERS APP (Prestashop)

- In this project, new sections will allow the customer to create a custom drawer system for his/her car. Admin has full control of the store site and For this, the customer has to first select the company of the car, model of the car, and year of the model. And lastly, customers can pay the price for his/her customization part. .
- In this project many modules are created: Two Image fields in the admin category, selecting car type model year dynamically, multilingual textarea and block, etc ., which made the user experience better for using the website.

GLASSEXPERTS (Prestashop)

- This is a Shopping site have admin, marketing, store, and customer site. Admin has controls on the store site and the store site have controls on the customer site. Store sites have multiple functionalities and a theme editor which designs customer sites. And this site is used to sell accessories related to glass doors and washrooms etc.
- In this project, the discount is applied for a particular product and for a particular area for "Canada" and a coupon discount is also provided to the subscribed customers of the site. Curl script is used to show the current status of the user's ordered product by using the provided tracking no. This is done by using the DHL(shipping) API.
