ABOUT ME

i am Rongala sai a passionate and detail-oriented Junior PHP Developer with 1.8 years of professional experience in building and maintaining dynamic web applications. My expertise lies in PHP CodeIgniter, MySQL, JavaScript, AJAX, Bootstrap, HTML5, and CSS3, with a strong focus on CRUD operations, role-based authentication, and responsive web design.
i have contributed to end-to-end project development, from gathering requirements to deployment ensuring applications are scalable, secure and optimized for performance. with a proven ability to work in Agile teams and a continuous drive to learn emerging technologies, i bring both technical depth and adaptability to every project i undertake.

WORK EXPERIENCE

VIRTUE WIRELESS PRIVATE LIMITED

Associate Software Developer   2023 - now

As an Associate Developer i have been actively involved in designing developing and maintaining web applications using php and Codeigniter. My role required close collaboration with cross-functional teams, ensuring seamless integration of front-end and back-end functionalities.

- Enhanced and maintained Dynamic web applications with PHP, Codeigniter, and Mysql
- Implemented role-based authentication, session management, and RESTful APIs.
- Participated in Scrum meetings, sprint planning and code reviews to ensure project success.
- Designed and optimized responsive front-end interfaces using Bootstrap, Ajax, and javaScript.

PROJECTS

PROJECT 1 : CALL CENTER MANAGEMENT ERP SOLUTION

Role : Web Developer | Technologies : PHP, Codeigniter, MySQL, AJAX, JavaScript

Developed a robust system to streamline call routing, agent management, and performance tracking.The application includes separate dashboard for Admin and Agents where agents could make calls, and dynamic call data was instantly reflected on the Admin dashboard through streamlined MySQL queries.

- Built Admin and Agent dashboard with real-time data synchronization
- improved application performance through debugging and MySQL query tuning
- Implemented role-based authentication and session management in Codeigniter

PROJECT 2 : E-COMMERCE PLATFORM

Developed an E-commerce platform with features like product listings, shopping cart functionality, order creation, The system enabled customers to browse products, add them to cart, and proceed through a seamless checkout process. upon successful checkout, order details were generated and sent to customers via email, ensuring a smooth purchase experience.

- expanded an Admin Dashboard for managing products, orders, and CRUD operations
- Integrated order confirmation email functionality to notify users post-checkout
- Built product listing and shopping cart modules using JavaScript, Ajax, and bootstrap.
