WORK EXPERIENCE

Trainee Programmer (php)— Share soft Technology

Mar 2025 – Jul 2025

- Developed and maintained RESTful APIs for mobile applications, focusing on booking systems and location-based features.
- Implemented multi-language support to enhance user experience.
- Identified and resolved bugs to improve API performance and stability.
- Utilized Postman to test and debug APIs, ensuring seamless client-side integration.

Intern – Mobile App Tester (Manual) — Glaclean.ai

Nov 2024 – Feb 2025

- Conducted manual testing for iOS and Android mobile apps across multiple devices using cloud platforms.
- Ensured compatibility across different software versions, including AI-integrated features.
- Identified bugs, inconsistencies, and performance issues; reported findings to the development team for resolution.

E-commerce website using (MERN)—EdexTech IT solutions

Dec 2023- Aug2024

- Developed an admin panel with MongoDB integration for managing product details and validating user data.
- Implemented Axios APIs with frontend animations to fetch, display, and filter products dynamically.

Credit Card Collection Agent— Lingam Financial Solutions

Jun 2020 – Nov 2022

- Monitored customer accounts for overdue payments and performed follow-ups to recover dues.
- Collected and analyzed payment data to inform collection strategies and reporting.
- Created visual reports and tracked individual progress to support decision-making.
