July 2023

Sunderdeep College of Management and Technology, Ghaziabad

TECHNICAL SKILLS

Languages:	PHP, Javascript
FrontEnd Technologies:	HTML, CSS, React.js, Laravel
Backend Technologies:	PHP, Express.js
Database:	MySQL
Version Control:	Git, GitHub

EXPERIENCE

LDS Engineers(Delhi) PHP Developer

(May 2025 - Present)

I built a portfolio website using React.js, JavaScript, CSS, and HTML, which I hosted on Netlify. The site showcases my completed projects, includes a contact form with EmailJS for direct messages, and features easy navigation with React Router. This project demonstrates my ability to create user-friendly, responsive websites.

Webshark Web Services(Bengaluru) Laravel Developer

(Jan 2024 - feb 2025)

I worked as a full-time software developer at Webshark, where I worked in 4 projects (**CosmosSports, United Petro, Leanwisdom**) maintain existing projects and built an e-commerce website from scratch. My focus was on backend development using Laravel, creating APIs, improving e-commerce features, and optimizing the performance and scalability of applications. I also gained hands-on experience with advanced Laravel features and optimized code for better performance.

Softmind Infotech Pvt Ltd(Noida) MERN Stack Developer(Internship)

(Jul 2023 - Dec 2023)

I built a portfolio website using React.js, JavaScript, CSS, and HTML, which I hosted on Netlify. The site showcases my completed projects, includes a contact form with EmailJS for direct messages, and features easy navigation with React Router. This project demonstrates my ability to create user-friendly, responsive websites.

PROJECTS

LMS projects PHP, MySQL, JS, CSS, HTML

Experienced in developing and customizing Moodle LMS projects, building multiple plugins to enhance functionality, optimize performance, and deliver client-focused e-learning solutions.

Cosmos Sports (e-commerce) PHP, Laravel, Blade, MySQL, JS, CSS, HTML

At Webshark, I worked on several projects, including building an e-commerce website from the ground up. I handled the backend development using Laravel, integrated APIs, improved e-commerce features, and made sure the website was fast and scalable.

Adimudra (Payment and Traveling) PHP, Laravel, Blade, MySQL, SQLite

I worked on the test server for Adimudra, focusing on two main services: Hotel and Holiday. My role included both frontend and backend development, where I integrated live hotel APIs. These services serve both businesses and customers. I also worked on improving the user experience and ensuring the system worked smoothly with real-time data
